DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a multifunctional polymer, classified in class 526, subclass 340.
 - II. Claims 6-18, drawn to process for preparing a multi-functional polymer, classified in class 526, subclass 237.

The intended scope of claim 19 cannot be determined because although it appears to be a method claim, it includes no method steps, and may be a product claim. Accordingly, it cannot be determined if the claim belongs in group I, group II, or another unspecified group. This claim will be rejected under 35 USC 112(2) and 35 USC 101 at the next Office action.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process could be used to make polymers other than those required in claim 1.

Art Unit: 1713

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Should group I be elected, then the following requirement for election of species applies: claim 1 is generic to a plurality of disclosed patentably distinct species comprising a multiplicity of polymer structures. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. The election must clearly identify a single polymer species.

Should group II be elected, then the following requirement for election of species applies: this application contains claims directed to the following patentably distinct species of the claimed invention: the processes of claims 6, 12, 17 and 18. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic to the four separate process claims. The election must identify one of the processes recited in claim 6, 12, 17 or 18.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 1713

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
